Career Objective: To secure a challenging position in the GIS and Remote Sensing sector where I can apply my technical expertise, project management skills, and coordination abilities to deliver innovative and impactful solutions. I aim to contribute my experience in geo-spatial analysis, database management, and automation to successfully plan, execute, and oversee projects, ensuring quality outcomes and timely delivery.

Professional Experience:

Position held: **Meteorologist**
Employer: **Green Delta Insurance PLC**
Department: **Impact Buisness**
Duration: *January, 2026 – Present*
Summary of activities: Climate Data Analytics; Weather Forecasting; Google Earth Engine; Python Programming; Climate Modeling,

Position held: **Assistant GIS Specialist**
Employer: **Sheltech Consultants (Pvt.) Ltd.**
Department: **GIS and Remote Sensing**
Duration: *December, 2024 – December, 2025*
Summary of activities: Python Scripting; Geospatial Tools Development; Geo-Processing Automation; Geo-Database Management; Geo-Database Quality Checking and Verification.

Position held: **Research Consultant**
Employer: **Center for Environmental and Geographic Information Services (CEGIS)**
Department: **Remote Sensing**
Duration: *October, 2023 – November, 2024*
Summary of activities: Satellite Image Processing; Geo-Referencing Satellite images, Generated Automated Workflows Via Python Based Script; Preparation of Land use, Cropping Pattern using Orthorectified Worldview-3 and Sentinel Images.

Education:

Level	Exam Name	Subject	Institute	Result	Duration	Passing Year
Masters	MS(Thesis)	Geography and Environmental Studies	University of Rajshahi	3.84	1 year	2021
Bachelor	BSc	Geography and Environmental Studies	University of Rajshahi	3.44	4 years	2020
Higher Secondary	HSC	Science	Nawabganj Govt. College	4.67	2 years	2016
Secondary	SSC	Science	Kholsi Bilateral High School	5.00	2 years	2014

Language and Degree of Proficiency:

Language	Speaking	Reading	Writing
Bengali	Fluent	Fluent	Fluent
English	Proficient	Proficient	Proficient

Software Skills:

ArcGIS; ArcGIS Pro; QGIS; TerrSet; IBM SPSS; ENVI; ERDAS IMAGINE; Power BI; Minitab; MS Products

Technical Skills:

Remote Sensing (RS):

- **Spatial Data Acquisition & Processing:** Expertise in sourcing, pre-processing, and managing satellite imagery and other spatial datasets.
- **Image Analysis & Interpretation:** Skilled in classification, change detection, and feature extraction for diverse applications.
- **Environmental and Land Use Modeling:** Proficient in remote sensing-based modeling for environmental monitoring and land use/land cover assessment.
- **Spatio-Temporal Simulation and Prediction:** Experience applying ANN and CA-Markov models for predictive spatial analysis.

Geographic Information Systems (GIS):

- **Spatial Data Management:** Competent in creating, maintaining, and integrating geospatial databases.
- **Cartography & Mapping:** Proficient in geo-referencing, digitization, and thematic map production.
- **Advanced Geoprocessing:** Skilled in spatial analysis using a range of geoprocessing techniques.
- **GIS Automation and Tool Development:** Experienced in Python scripting and building custom geospatial tools for workflow optimization.

Research & Survey:

- **Survey Planning & Coordination:** Capable of organizing and supervising field surveys, FGDs, and KIIs.
- **High-Accuracy Data Collection:** Skilled in GCP collection and RTK-based positioning systems.
- **Data Analysis & Reporting:** Proficient in statistical analysis, interpretation, and preparation of technical reports.

Data Visualization & Design:

- **Interactive Dashboard Development:** Experienced in creating dynamic dashboards using Looker Studio and Power BI.
- **Technical & Spatial Design:** Skilled in CAD design and spatial layout planning.
- **Graphical Data Presentation:** Capable of producing charts, infographics, and statistical visuals using Excel, Minitab, and other tools.

Worked on Projects (Professional):

Project Name:	JVA for Climate-Resilient Insurance Solutions under the NABAPALLAB Programme
Year:	<i>March, 2026 – Present</i>
Employer	<i>Green Delta Insurance PLC.</i>
Client:	iDE Bangladesh (NABAPALLAB Programme)
Main project features:	The project aims to develop and pilot climate-responsive insurance solutions for farmers, Local Entrepreneurs (LEs), in Ecologically Critical Areas (ECAs) of Bangladesh. It focuses on risk assessment, insurance product design, and implementation of bundled finance-insurance models to enhance resilience in agriculture, aquaculture, renewable energy, and WASH sectors.
Positions held:	Meteorologist
Activities:	FGD questionnaire Design and Conduct; GEE-Based Climate Data Analysis (ERA5, CHIRPS); Climate Risk Assessment and Beneficiary Segmentation; Data-Aligned Insurance Product Design and Pilot Implementation; Awareness and Capacity Building; Monitoring, Reporting, and Stakeholder Coordination..
Project Name:	Consultancy Services of Checking, Verification and Receiving of Digitize Mouza Map Sheets across the Bangladesh
Year:	<i>December,2024 – December,2025</i>
Employer	<i>Sheltech Consultants (Pvt.) Ltd.</i>
Client:	Ministry of Land (MOL)
Main project features:	The main target of the project is to quality ensure of digitize Mauza map sheets and give findings, recommendations for better quality of mouza map sheet. Besides it also ensures the quality of edge matching, geo-referencing as per mouza sheets.
Positions held:	Assistant GIS Specialist
Activities:	GIS Mapping and Remote Sensing; Digitizing and Database Preparation; Mouza Data Processing; Geo-referencing and Edge Matching; Land-Use Database Updates; Database Management; Python Scripting.

Project Name:	Consultancy Services for Land Use Mapping using Satellite Images and Remote Sensing Technology
Year:	<i>January, 2024 – November, 2024</i>
Employer	<i>Center for Environmental and Geographic Information Services (CEGIS)</i>
Client:	Ministry of Land (MOL)
Main project features:	The main target of the project is to prepare Mauza and Plot Based National Digital Land Zoning maps. The Mauza and plot-based maps and data will help to control all kinds of land degradation and ensure land uses by its categories. It should allow informed choices for investment in human and physical resources and impose protective regulations were needed.
Positions held:	Research Consultant
Activities:	High resolution Satellite image georeferencing, GCP collection, Road Determination, Waterbody Delineation, River-canal delineation, Land use Land cover detection, Ground-truthing, Crop Pattern Determination.

Project Name:	Chittagong City Water Logging Project
Year:	<i>October, 2023 – December, 2023</i>
Employer	<i>Center for Environmental and Geographic Information Services (CEGIS)</i>
Client:	Chattogram Development Authority (CDA)
Main project features:	The main target of the project is to establish a well-structured drainage system to properly collect and discharge of water through the city to mitigate water logging.
Positions held:	Research Consultant
Activities:	River-Canal channel determination, Drainage network development and Water flow direction determination from field survey data, Ground-truthing, Drainage system Modeling.

MS(Thesis) Research:

Thesis Title:	Assessing Heatwave Patterns Due to Land Cover Changes Impact on Land Surface Temperature: A Comparative Study Between Rural and Urban Area in Bangladesh
Year:	<i>August, 2021 – September, 2023</i>
Institute	<i>Dept. of Geography and Environmental Studies, University of Rajshahi</i>
Supervisor:	<i>Dr. Mizanoor Rahman, Professor, Dept. of Geography and Environmental Studies, University of Rajshahi, Rajshahi-6205, Bangladesh</i>
Main project features:	The main target of the project is to assessment of heatwaves patterns due to land cover changes impact on land surface temperature and differentiate it between rural and urban area.
Positions held:	Research Assistant
Activities:	Data Analysis, Field survey, Questionnaire survey, Report Writing

BSc(Hons) Project:

Project Title:	Assessment of Socio-Economic Impact of Riverbank Erosion: A Case of Chapainawabganj Sadar Upazila.
Year:	<i>March, 2020 – July, 2022</i>
Institute	<i>Dept. of Geography and Environmental Studies, University of Rajshahi</i>
Supervisor:	<i>Zihad Ahmed, Assistant Professor, Dept. of Geography and Environmental Studies, University of Rajshahi, Rajshahi-6205, Bangladesh</i>
Main project features:	The main target of the project is to assessment of the historical erosion and accretion of Padma River channel (Part of Chapainawabganj sadar Upazila) and find out the impact of it on socio-economic status of that area.
Positions held:	Research Assistant
Activities:	Data Analysis, Field survey, Questionnaire survey, Report Writing
